Archived from the original on December 25, 2014. Random professional development days are insufficient. [216] According to Jenkins, "Beyond treating each technology in isolation, we would do better to take an ecological approach, thinking about the interrelationship between different communication technologies, the cultural communities that grow around them, and the activities they support. "[210] Jenkins also suggested that the traditional curriculum led teachers to train students to be single-handed.[210] However, today's workers are increasingly being asked to work in teams, taking advantage of different sets of experience and collaborating to solve problems. [210] Learning styles and methods of gathering information have evolved, and "the students often feel excluded from the worlds described in their textbooks through the depersonalized and abstract prose used to describe them".[210] These twenty-first century skills can be achieved by incorporating and use of technology. [217] Changes in the teaching and use of technology can also promote a higher level of learning among students with different types of intelligence. [218] Evaluation Main articles: Educational assessment and e-evaluation There are two different evaluation issues: the evaluation of educational technology [210][219] and the evaluation with technology [210][219] and the evaluation of educational technology assessments have included the Follow Through project. Archived from the original on August 31, 2012. "Benefits of the TED Talks." Addressing the challenges of participatory culture: media education for the twenty-first century. Technology is important: questions to live. Merrienboer and M. New York, NY: Lawrence Earlbaum Associates. "Moving the performance of the smart city." "The impact of e-learning." doi: 10.1177/2329490615606733. In a study conducted by Cornell and Stanford universities, the students' departure rates of MOOC students have been attributed to the anonymity of students, the loneliness of the learning experience and the lack of interaction with peers and teachers. [165] The effective measures of participation of students who reduce dropouts are the interactions of the forum and the presence of virtual teacher or teaching assistant, measures that induce the cost of staff growing with the number of participating students. ^ Hickey, Ryan (12 May 2014).
